

# PilotPro

## Product Information

### Free valuable IT resources, automate production

PilotPro is compatible with all Anchor products, as well as 3rd party applications, which means it can be easily implemented with no additional equipment, software, or integration effort. Users can configure, process, and track multiple jobs with confidence and ease. PilotPro will send email alerts when a job starts, ends, is modified, or fails. Simply specify the application and the trigger, and PilotPro will do the rest.

#### Compatible with all 3rd party applications

Launches any program or batch file

Services can be installed on multiple servers - on a network or the internet

Archive database and job reporting

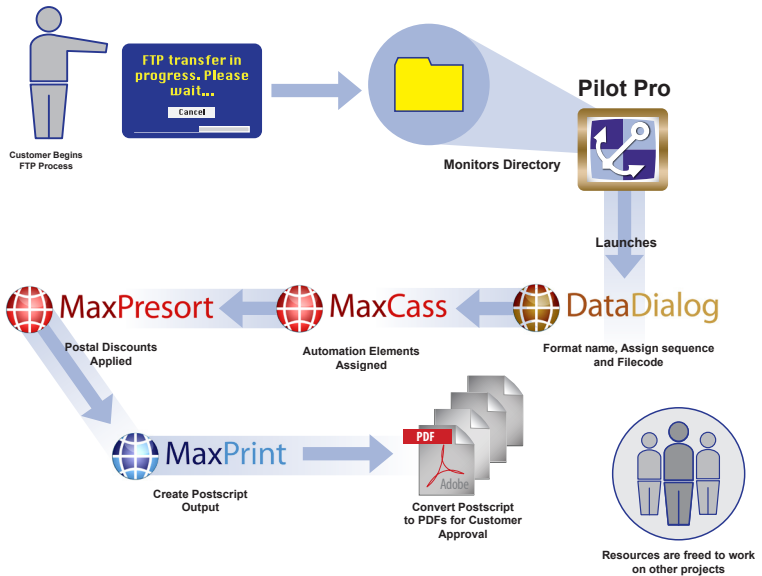

Instantly start processing files when a trigger file appears or schedule a time window for processing

Creates log files with job activity for debugging

Set time limits for jobs to terminate automatically

#### Pilot Pro Advantages

- Automate your repetitive processes.
- Launch jobs as soon as a new file or version appears.
- You can also set PilotPro to run jobs on multiple computers. Jobs can be
- Run jobs as a "service" on multiple computers over networks.
- Distribute your workload across resources,
- View All Active And Completed Jobs
- Error Handling Capability
- Automatically restart due to system failure or wait for a new trigger.
- Saves time and assure critical goals will be completed in case of system failure
