

Create, Import, Maintain, and Monitor PAFs

Save time and money by automating completing, signing, and printing hard copy PAFs!

Meets USPS NCOA^{Link} PAF requirements

Fully customizable for logos, color scheme control, etc...

Upload and catalog existing PAF data

Simplify the PAF renewal process

Easy retrieval of PAF Documents

Notification of PAF expiration dates

Available as in-house or as a hosted solution

myPAF, Anchor Software's easy-to-use web-based solution for creating, importing, maintaining, and monitoring Processing Acknowledgement Forms (PAFs).

myPAF is a paperless automated system that meets all USPS PAF requirements. myPAF streamlines the PAF process by consolidating multiple functions that previously were performed by hand. myPAF combines data entry, form completion, approval, electronic storage and reporting for NCOA^{Link} processing into a single program, and allows you to store your PAF documents electronically rather than as a hard copy.

Whether as a hosted solution or in-house software, myPAF reduces the labor associated with creating PAFs and eliminates the need to physically store PAFs, while enabling you to access and produce the hard copy if required.

myPAF In-House Solution

myPAF as a software solution is an in-house software product with a fully customizable web interface, installed and maintained by the end-user, with software and PAFs on local servers behind end-user firewalls.

myPAF Hosted Solution

myPAF as a hosted solution offers a fully customizable web interface through a secure login, which will allow companies to brand the website themselves and integrate it with the current look and feel of their own websites. Anchor will be 100% responsible for back-ups, updates, and maintenance, thereby freeing up IT resources.
